Art Unit: 1644

DETAILED ACTION

1. Applicant's election of Group I, drawn to a pharmaceutical composition comprising an Fc fragment as a carrier, filed on February 8, 2008, is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1, 9, 10, and 13 have been amended.

Claims 1-26 are pending.

Claims 14-26 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention.

Claims 1-13 are currently under consideration.

2. Upon further consideration, the following Species Election of claims 1-13 has been set forth herein.

Species Election

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1 for following reasons:

Sun et al. (US Patent Application 2003/0082679, reference on PTO-892 mailed on January 9, 2008) teach a pharmaceutical composition comprising a fusion protein comprising erythropoietin (EPO) and human IgG4 Fc region; and methods of improving half-life of EPO by conjugating EPO to IgG4 Fc region (e.g. see Figure 2B and Summary of the Invention on column 2).

Art Unit: 1644

Since Applicant's inventions do not contribute a special technical feature when viewed over the prior art they do not have a single general inventive concept and so lack unity of invention.

The species are as follows:

4. Applicant is required to elect one specific pharmaceutical composition comprising an Fc region, wherein said Fc region is:

A) glycosylated, **OR**

B) aglycosylated.

5. In addition, if either (A) or (B) is elected, applicant is further required to elect specific Fc fragment (e.g. IgG4 Fc fragment as recited in claim 7).

6. In addition to the species election above, applicant is also required to elect one specific pharmaceutical composition comprising:

i) specific non-peptide linker (e.g. PEG as recited in claim 13), **AND**

ii) specific physiologically active polypeptide (e.g. human erythropoietin as recited in claim 12).

These species do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Art Unit: 1644

7. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

8. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chun Crowder whose telephone number is 571-272-8142. The examiner can normally be reached on 8:30-5:00. If attempts to reach the examiner by telephone

are unsuccessful, the examiner's supervisor Eileen O'Hara can be reached 571-272-0878. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
